- What is working? :

I have tested my program against the following:

Algorithms:
  1. Asynchronous Gossip
  2. Push sum Protocol

Topologies:
Both the algorithm convergence is checked against following four topologies:
1. Line
2. 2D
3. Full
4. 2D Impatient.

- What is the largest network you managed to deal with for each type of topology and algorithm?

Topologies\Algorithms	Asynchronous Gossip	Push sum
Line	10000	1000
2D	20000	5000
Full	20000	5000
2D Impatient	20000	5000
